The Macro 48 Solid bins are the worlds largest fixed-wall, high-pressure, injection-molded bin, replacing 4x4x4 foot metal, corrugated, or wood containers. Used for food processing applications and storage, the smooth, nonporous surfaces of these bins help to reduce the potential for cross contamination.

Features and Benefits

Rounded corners and smooth surfaces mean fewer scuffs, abrasions, and cuts on your tender fruits. Risk of contamination is reduced because there are fewer places for unwanted particles to hide.

FDA-approved materials are certified safe for use with food products, eliminating many HACCP problems associated with wood bins

Lightweight construction reduces shipping costs and makes MacroBins easier to move; he direct load corner posts and interlocking foot design make them safer to stack – up to 5 high.
